

# Avcon Noise Suppressor

# Lear 20 Series Lives On

- The Avcon Noise Suppressor STC permits Learjet 20 series aircraft to comply with Stage 3 noise limits.
- The Avcon Noise Suppressor kit, once installed, passively controls the jet flow for optimum noise reduction using methods resulting from the latest breakthroughs in noise suppression technology.
- Downtime for complete installation: 3 to 7 days.

For more than 40 years, Avcon Industries has provided Learjet owners and operators with a variety of enhancements designed to improve the versatility and utility of business jets and turboprops. Our Technical Services include: Project Management, DER Engineering Support, PMA Parts Manufacturing, STC Approved Airframe Modifications, Maintenance & Repairs (FAA & EASA approved), DER Flight Testing and STC Coordination.

Avcon has produced over 250 FAA approved STCs and is AS-9100 and ISO-9001 certified.

Our Sales team covers the entire globe, with representatives fully dedicated to sales and customer support in the United States, Central & South America, Europe, Asia and Africa.
